

GC BEO 25 W

Dibenzoyl Peroxide 75% with water

CAS Registry Number 94-36-0

GC BEO 25 W is an excellent catalyst for free radical polymerization process, used in the production of polystyrene, polyvinyl chloride and methacrylates and for the cross-linking of unsaturated polyester resins. Its catalytic activity will depend on several different factors including type of monomer, temperature and presence or absence of accelerators or inhibitors.

PHYSICO-CHEMICAL PROPERTIES

Appearance	White Powder
Assay, %	75±2
Bulk density, g/cm ³	0.63

HANDLING AND STORAGE: The processing and use of GC BEO 25 W requires adequate technical and professional knowledge. Please consult safety data sheet for further handling, storage and toxicity information.
GC BEO 25 W has to be stored in a tightly sealed original container in a cool and well-ventilated area, away from direct sunlight.

PACKAGING: Standard packaging of GC BEO 25 W is 20 Kg cartons.

IMPORTANT NOTE Some plastic additives, fillers or pigments can have a significant influence on the properties of the end product. Before using this product, please be informed. Machine stop at high temperature could create degradation of polymers. Please clean with neutral polymers.
